

2008 APL/Pork CRC Roadshow

4 November - Perth, WA

US guest speaker Randy Stoecker, former president Western Operations, Murphy Brown (Smithfield), will provide an insight into the US pork industry.

Including:

- Key production changes and technologies that have shaped the US industry; and
- Latest and future US production strategies.

Key pork industry researchers will also speak on outcomes from recently completed APL and Pork CRC research projects. These include:

- Effect of betaine supplementation and parity on sow fertility and litter size;
- Feed strategies and budgets using Feedlogic;
- Incorporating Paylean & pST (Reporcin) to improve feed conversion efficiency in late finishing;
- Release of NIR calibrations, new triticale varieties and closed loop marketing;
- Straw - more than just bedding;
- Opportunities for underpinning the integrity of Australian pork; and
- Advances in carcase measurement using PorkScan.
